RE: MORRISON STREET DEBT OPPORTUNITIES FUND

The Spokane Employees' Retirement System (SERS) invests approximately \$2.9 million (0.8% of total Plan assets) in the Morrison Street Debt Opportunities Fund (Fund). The Fund was created in 2016 to offer refinancing to real estate loans that were expected to mature en masse in 2016-2017. While opportunistic in nature, the Fund essentially follows Morrison Street's approach of providing mezzanine financing to smaller-end real estate entites. The Fund was structured to provide investors with a liquidity event within its first four to seven years. To provide this liquidity event, Morrison Street has arranged to restructure the Fund without changing its fundamental strategy. The process by which this restructuring is expected to happen is outlined below.

- 1. In the coming weeks the Fund will transfer to the newly created Morrison Street Income Fund (MSIF),
- 2. Through debt and equity financing, MSIF will raise capital to provide liquidity to investors seeking it,
- 3. For approximately the next eighteen months, MSIF will operate as a private fund. During this period, Morrison Street may seek to register MSIF as an "interval fund", a legal structure recognized under the Investment Company Act, and which allows for quarterly liquidity on a limited basis. If MSIF does not convert to an interval fund, it will remain a private fund with a term of twelve years.

The Hyas Group recommends that SERS retain its position in MSIF, regardless of if it being an interval or private fund. Doing so will allow SERS to retain participation in Morrison Street's nimble and unique approach to real estate investment. SERS will need to complete an Accredited Investor Verification Letter and Investor Election Form, both of which are brief, to allow this transition. The Hyas Group can assist with the process as needed.

Thank you and please let me know if there are any questions.

Sincerely,

Jayson Davidson, CFA
